POLICE RECORDS AND INFORMATION
PR Management Group

The City of Nashville, Tennessee has selected Police Records and Information Management Group to assist with an internal audit of the Metropolitan Nashville Police Department's crime statistics. After highly publicized media reports questioning the department's crime statistics were broadcast, the Mayor of Nashville requested an audit to ensure the police department is reporting crime correctly and producing statistics that accurately reflect reported crimes.

This project will include an independent review of Nashville crime report classifications, case clearances, and supervisory review procedures.

The Nashville Police Department has over 1900 employees and responds to over 750,000 calls per year.

Police Records and Information Management Group is law enforcement's premier source of comprehensive integrated training and consulting services specific to police records and technology. We specialize in projects that include RMS implementations, records unit process improvements, crime stat audits, and information management programs.
